

BYRAM HILLS

CENTRAL SCHOOL DISTRICT

10 TRIPP LANE ARMONK, NY 10504

November 4, 2020

Good morning,

The District continues to work with the DOH in tracking cases at BHHS. We have now heard of a 9th case, as per test results yesterday. The DOH is investigating whether or not this latest case may be linked to previous cases and social events or not.

The DOH indicates that the District does not have to quarantine any other students or staff due to the time between when the individual was in school and the time the individual became symptomatic. This new case, which is later than the others, is precisely why it is important to have switched to remote instruction.

I will continue to keep you updated on new information as it arises.

Thank you,

Jen Lamia, Ed.D.
Superintendent of Schools
