

Program Shift to **Add Pathways** to Acceleration

Current

- Opportunity to accelerate exists in the middle school ***only***
- Accelerated curriculum moves quickly through foundational content
- Some components of the placement criteria ***appear subjective***

Placement criteria composed of tests, grades, and behaviors

New Approach

- **Two** opportunities to accelerate
 - Decision point at the end of 7th grade and 9th grade
- Accelerated curriculum spends more time on foundational content and goes deeper into the mathematics
- Placement criteria are documentable

Placement criteria composed of multiple measures of student achievement and work samples

Adding pathways to accelerated math!
